Take Away Without Throwing Away

Ordering takeaway and delivery produce a lot of plastic waste. A gourmet three course meal means three courses of plastic containers. And only 9% of plastic is recycled globally. On top of that, most delivery services charge a lot, which eats into your revenue.

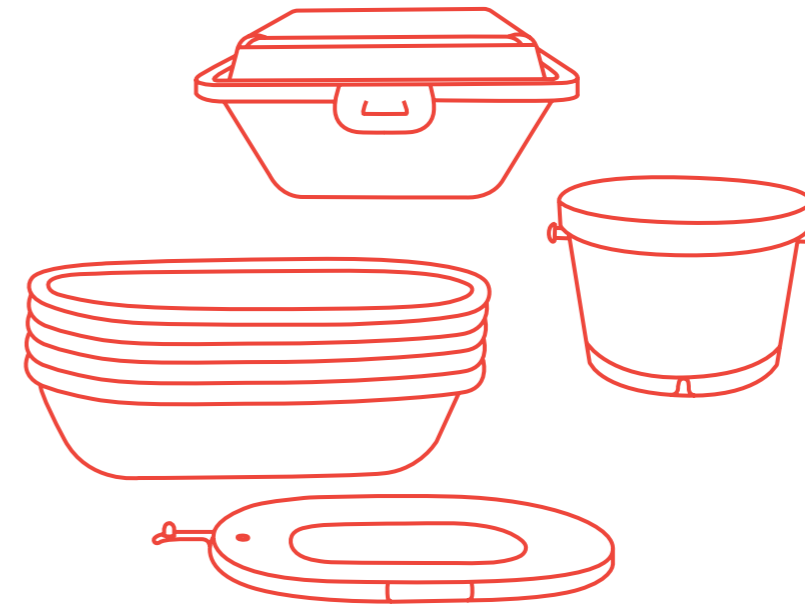

Ozarka offers a suite of solutions to help you replace disposable containers with reusables: DeliverZero, Reusables as a Service, and ARK Reusables. Our comprehensive solutions are cost effective, and slot right into your existing business and systems.

If your customers have asked you to ditch disposables, you've come to the right place. Together, we can make single-use plastics obsolete, and help you offer your customers a guilt-free, sustainable, and delicious experience.

You've Got Options

Ozarka and DeliverZero each offer their own circular solution for restaurants to pay less and waste less. Both services provide sturdy, reusable containers that fit your existing workflow and make your food pop.

deliver**zero**

When you join DeliverZero, your customers order via DeliverZero, and you pack the food in our containers.

Customers drop off their containers after use at any participating restaurant or hand them off to delivery people on their next order. Containers go right into your regular dishwashing cycle, and ordering more containers is simple and easy. In 2021, we'll offer smart drop boxes for easy container return.

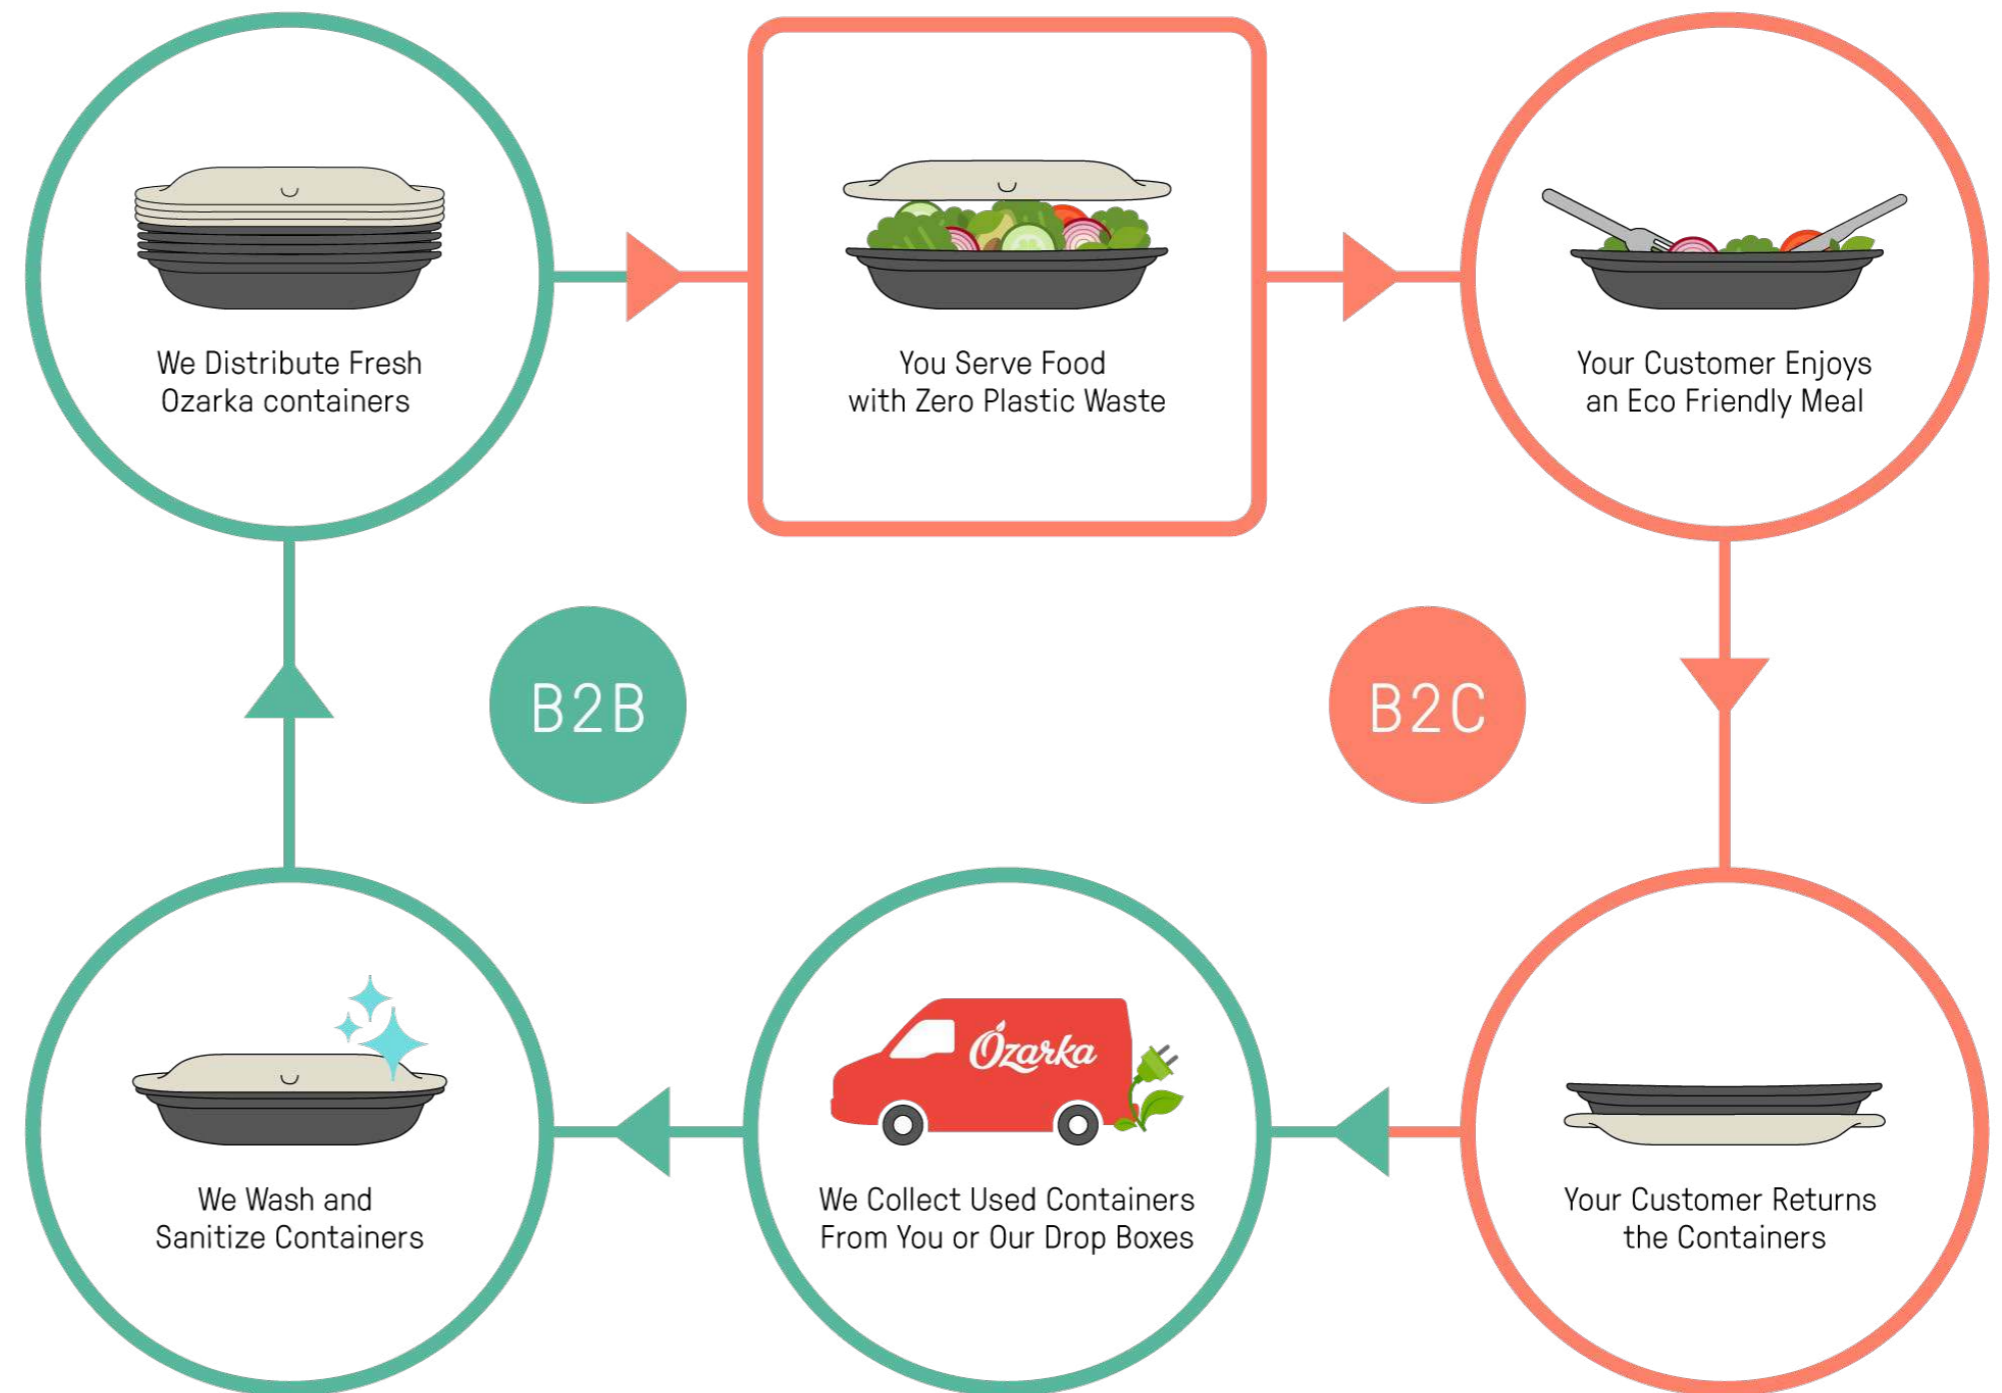

Ozarka

When you sign on with Ozarka, you do the food, we do the dishes.

We provide the containers, pick them up after use, wash them, and return them in time for tomorrow's service. We can even arrange pickup from clients and customers. In 2021, we'll offer smart drop boxes for easy container return.

HOW IT WORKS

Ozarka and DeliverZero's services show your customers you care about the environment as much as they do – and save you money with every order. Ozarka's Reusables as a Service container rentals cost about the same as premium disposables. DeliverZero offers the containers for free, charging a 12,5% commission on the total order.

MEET THE CONTAINERS | DURABLE TAKEAWAY

Durable Takeaway works with both Ozarka and DeliverZero.

These containers are lightweight, easily stackable, dishwasher-safe, and made from sustainable materials.
